PROFILE

I am a web designer and a web developer at the same time. I have been practicing it for a number of years. I love doing both but I am more into designing. I love my ideas and creativity bring to life. I hope to be able to share what I have learned and contribute it to the growth of your team or organization.

WORK EXPERIENCE

Freelance Web Designer/Developer   2016 - PRESENT
Freelancer

- I started this for common friends and eventually referred to some of my clients from US, EU, Asia, AU and NZ
- I build websites using WordPress or Shopify with site builders like Elementor and Thrive Themes
- I can also build websites from scratch or with template if requested

Unleashing Potential   2024
Web Developer

- I redesigned the company website and also their partner company website
- Served as a support for updating or uploading contents to their internal sites
- Also served as a technical support for websites technical issues

Genpact   2017 - 2018
Web Content Manager

- I was tasked to build a web application for the internal support team
- I integrated the tech support internal tools into a single page portal
- Also built the new version of the knowledge base for the team

TELUS International Philippines   2015 - 2017
Web App Developer

- Enhanced the UI of the tech team ticketing system
- Developed a macro functionality to automate the canned responses for the agents when responding to customers
- Also built the single page and integrate their internal technical tools
